**Subject:** RE: CAD cell modeling call?

Bob - as long as ERDC understands we're still looking for a final product in the September time frame than we don't need to waste people's time with a call. Perhaps you could send them a quick email confirming their understanding of the schdule??

Thanks - Dave

	Subject	RE: CAD cell modeling call?

The ERDC folks have done some work in setting up the model, etc., however, as you mentioned, the receipt of the data is when the "ball will start to roll".

We can have a call soon if you like to re-introduce ourselves and to reiterate the importance of the schedule OR we could have this call when the data arrives? A call now would be short. My preference would be to wait until the data arrives.

Pl. advise.

Bob

Subject: CAD cell modeling call?

Bob and Tom - I wanted to check in and see if it made sense to have a status update conf. call regarding the CAD cell modeling. Maybe everything's on hold pending the lab results from the field collection effort?? But its been a while since we discussed as a group so if you see any value in getting ERDC on the phone then please let me know. We still need the final report this fall...thus my concern.

Thanks - Dave
